Summary

Computer Science Engineering graduate with skills in Java Full Stack development. I have knowledge of Java, OOP concepts, MySQL, and basic web technologies. I am looking for an opportunity to start my career as a Java Full Stack Developer and contribute to software development projects.

EXPERIENCE

	Echobrains Java Full Stack Intern EchoBrains is a technical training institute that provides industry-focused courses like Java Full Stack, Data Science, and Software Testing to help students build careers in the IT industry. - Streamlined user experience through front-end development with HTML, CSS, and JavaScript, improving usability and engagement. - Championed best practices in Full Stack Development throughout the organization, leading to improved overall code quality and efficiency. - Enhanced application performance by optimizing Java code and implementing efficient algorithms.	bengaluru,india 01/2026 - Present
--	---	--------------------------------------

SKILLS

Tecnical Skills: Java • Spring Boot • JavaScript • HTML • CSS • MySQL • OOP Concepts

Soft Skills: Communication • Teamwork • Problem Solving • Time Management • Adaptability

Training / Courses

Java Full Stack

Education

Veerappa Nisty Engineering College, HASNAPUR,Karnataka, India Bachelor of Engineering Computer Science GPA: 10 / 7.6	HASNAPUR,Karnataka, India 05/2026
Raja Nalwadi Venkatappa Nayak Science PU College ,Shahapur, Karnataka Pre University Science	shahapur,karnataka 05/2022
Shree Basavalingappa Sahu Smaranarth High School SSLC Secondary Education	Chamanal ,Dist-Yadagiri, Karnataka 06/2020

Projects

Blood Group Detection through Fingerprint Images using Image Processing (KNN)	Shorāpur, India 12/2025
The project successfully predicted blood groups using fingerprint images by applying image processing techniques and the KNN algorithm. - Developed a system to predict human blood group using fingerprint images by applying machine learning techniques. - Used image processing methods to extract fingerprint features such as ridge patterns and minutiae points for analysis. - Implemented a KNN (K-Nearest Neighbors) classifier to classify and predict blood groups (A, B, AB, O) with good accuracy.	

Projects

Student Management System

shorapur,india

01/2023 - 04/2023

The **Student Management System** is a software application used to manage student information such as student details, courses, and records. It helps to store, update, and retrieve student data easily. The system improves efficiency by reducing manual work and organizing student information in a structured way.

- Developed a Student Management System project utilizing HTML, CSS, JavaScript, and PHP.
- Added, updated, deleted, and searched student records.
- Integrated PHP for persistent data storage.
